INTRODUCTION

Building Basic Vocabulary: Tracking My Progress is designed to accompany Marzano Resources’ *Building Basic Vocabulary*, a web-based tool focused on the 2,845 basic terms (organized into 420 clusters) from *Teaching Basic, Advanced, and Academic Vocabulary: A Comprehensive Framework for Elementary Instruction* (Marzano, 2020). The online interface includes four components that are designed to be used in combination with this book:

1. An assessment to determine the cluster at which a student should begin.
2. A printable activity packet for each cluster.
3. A short video for each cluster featuring its basic terms.
4. A search function to locate the cluster of any basic term.

The purpose of this book is to allow students to track their level of understanding for the 2,845 basic terms and the 2,889 challenge words featured in *Building Basic Vocabulary*. In the following pages, the basic terms and challenge words are listed by cluster. Next to each term is a four-point scale. Students can use the following descriptors to rate their level of understanding for each term.

Scale for Self-Evaluation of Understanding of Terms

Understanding Level	Descriptor
4	I understand even more about the term than I was taught.
3	I understand the term and I’m not confused about any part of what it means.
2	I’m a little uncertain about what the term means, but I have a general idea.
1	I’m very uncertain about the term. I really don’t understand what it means.

Adapted from Marzano & Pickering, 2005.

Finally, there is space next to each term for students to jot down a few notes or draw a simple picture to help them remember what the term means.
